

Having come from the FM-broadcast arena after 6 years of being a disc-jockey on Washington, DC radio - I am a HUGE supporter of satellite radio. I choose to PAY for a high-quality, well produced service that gives me the content variety I'm looking for without the jabber of so-called 'talent' that pollutes the regular AM/FM airwaves morning, noon and night.

Because MY DOLLARS are paying for this service, XM Satellite Radio should have every right to continue broadcasting (and improving the scope of) local content.
